

LEGACY PROGRAM**4-STAGE OPEN HIGH PRESSURE BREATHING AIR COMPRESSORS**

The LEGACY program units are built on the popular and serviceable VERTECON platform and are not stripped down units. Rather they are built with BAUER's most popular options and upgrades!

LEGACY units will be built in quantity utilizing proven "work cell" manufacturing techniques for "off the shelf", in-stock delivery. This quantity build coupled with the uniform LEGACY platform enables us to capture economies of scale which in turn allows us to leverage internal resources and supply chain management. This translates into a price structure that offers substantial savings above and beyond our normal discount for our valued distributors.
